

# OMC International reduces operational risk.

OMC International (OMC) has been delivering innovative solutions for more than 30 years to improve safety and efficiency in the shipping industry; making the global shipping industry safer and more efficient.

Their dynamic under keel clearance (DUKC<sup>®</sup>) systems have been installed at most major Australian ports and in New Zealand, Europe and North America

OMC's technology maximises port capacity, ensures pilot safety, equips port authorities with essential risk mitigation tools, and saves billions of dollars in shipping costs of transporting bulk cargo and container goods around the world.

Headquartered in Abbotsford, OMC has a growing workforce of more than 50 employees.

On 16 November 2015, OMC was named Winner of the prestigious international 2015 IJ Safety in Bulk Handling (Marine) Award for its maritime technology

## Objective

Working from a single site employing specialised staff with in-depth knowledge of their propriety systems, OMC needs to ensure that the business would survive a major incident without impacting their 24/7 support to global clients.

## Solution

- Review and perform gap analysis of OMC's Business Continuity Programme (BCP)
- Undertook Business Impact & Critical Resource Analysis
- Developed Business Continuity Strategies
- Developed Business Continuity Plans
- Business Continuity Exercise
- Aligned with ISO standards and BCI Good Practice Guidelines

## Benefits

- Supports OMC's Quality Control accreditation
- Able to recover critical resources in a timely manner
  - Office facilities
  - Staff
  - IT Services
  - Critical Equipment
  - Suppliers
- Reduced Business Insurance Costs
